“We used to spend hours typing our product labels. When we needed to add a barcode it became a nightmare. Labels for QuickBooks made the whole process easy and very fast. I estimate that we are saving hundreds of dollars in man hours every year.”

- Joe Anderson

The **Basic program** allows you to print all your product labels from an exported excel spreadsheet of your Item List.

The **Advance program** does not require you to export to a spreadsheet. It is connected directly to QuickBooks.

Add-On Modules

3 SHORT STEPS

The Beginning

This program was created almost 7 years ago when a small Diamond Jeweler wanted to print "rat-tail" labels for his rings but couldn't. (Rat-tail labels are the small tags that are used to wrap around the band of a ring or another piece of jewelry.)

He came to us, asking for our help. He explained how many hours it takes his wife to sit at the computer and to retype the jewels information. When we asked around we found out that it was almost impossible to produce product labels from QuickBooks.

We created this program and designed it for anyone using QuickBooks as their main source of Inventory Management. Today we are able to produce labels for any item in QuickBooks with barcodes.
